Zero-Gravity Recliner
PC-075

SILHOUETTE

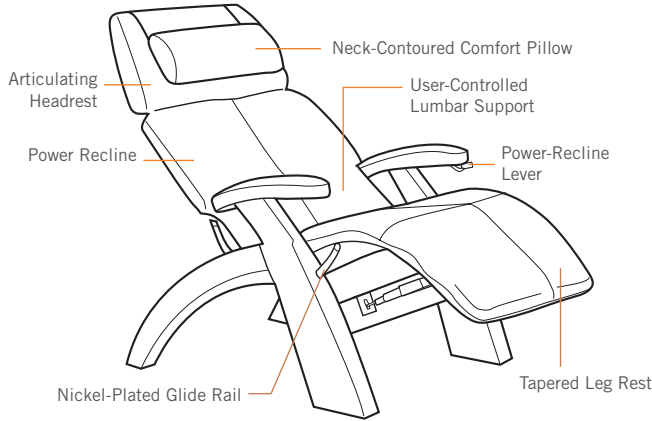

A more compact chair
to fit in any home décor.

Perfect is a chair that fits your body and décor—perfectly.

All you have to do is climb a few flights of stairs to understand that gravity can be a real drag. But now there's a comfortable way to relieve the soreness, tension and fatigue caused by the earth's constant gravitational pull on our bodies. Welcome to the Human Touch® Perfect Chair® PC-075 Zero-Gravity Recliner.

Inspired by the Neutral Body Posture studied by NASA during the SkyLab program, the PC-075 places the body in a virtually weightless position. In this physician-recommended posture, the spine, hip, and knee joints are on or close to the balanced midpoint of the muscles. This results in natural relaxation and minimum muscle tension. The PC-075 gives your neck and back a much-needed breather and allows the body to restore its natural balance. And it's equally impressive on the eyes. With its numerous color combinations, solid eco-friendly parawood base, tapered footrest and sleek silhouette, this amazing chair fits your physique, conscience and design sense perfectly.

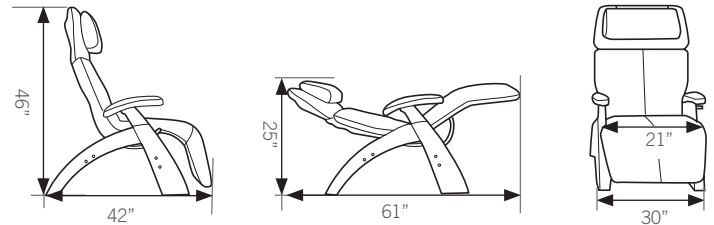

More Features for More Comfort

FEATURES:

- Exclusive nickel-plated glide rail ensures smooth recline motion
- Articulating headrest allows you to customize the optimum angle of comfort, maximizing neck support at any recline angle
- Tapered headrest and footrest offer a sleek silhouette design
- Luxurious aniline-dyed premium leather, supple bonded leather, or plush velvety SöfSuede®
- Built-in, self-inflating lumbar pillow allows customizable support

3-Year Limited Warranty

The weight is over.

The Perfect Chair is expertly engineered and crafted to defy gravity's adverse effects, placing the body in a position to restore its natural wellness. Incorporating only the finest designer materials and finishes, it's also pretty easy on the eyes.

SLEEK SILHOUETTE

The PC-075's tapered footrest and streamlined footprint means you can enjoy modern-looking, zero-gravity comfort while using less space than the PC-095 and PC-6.

ECO-FRIENDLY BEAUTY

Using only 100% renewable, plantation-grown solid parawood, highly trained Human Touch master woodworkers hand-carve and hand-finish the signature balanced curves supporting the Perfect Chair. As one of the strongest woods on earth, the *Havea Brasiliensis* (rubber tree) ensures durability and beauty for years of use. Choose from three attractive finishes.

A PERFECT FIT

The PC-075 is created especially for those smaller in stature and short of square footage, and its ergonomic design makes it easy to link in a home theater arrangement.

SUITS YOUR STYLE

Make the PC-075 your own by choosing from three attractive wood finishes and a variety of colors in premium or bonded leather, or SöfSuede® upholstery.
